NGO Management System

UI and UX foundations for the public website and the admin app. Tokens are variables, so changing one updates every screen. Green carries the brand, marigold is used sparingly for the one action that matters most (Donate).

Shape and spacing

sm 6 md 8 lg 12 xl 16 arch (hero photo)

Spacing scale: 4, 8, 12, 16, 20, 24, 32, 40, 48, 64.

Design principles

- One memorable moment: the arch photo with a rising sun on the home page. Everything else stays quiet.
- Show only what exists. A public section with no content disappears, and a screen with no data explains what to do next.
- Words say what will happen: "Send application", "Save changes". Errors say what went wrong and how to fix it.
- Every screen works at phone width, with visible keyboard focus and a skip link.
- Staff screens are dense and calm. Public screens are generous and editorial.
